

I want to tell the FCC that I benefit from listening to XM Satellite Radio and its traffic and weather channels. Satellite radio provides variety and quality that are not available elsewhere. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve. I think that if people are willing to pay for a service, they should receive it especially considering the fact that cable providers have some sort of news/traffic/weather channel of their own, of which you must be a subscriber to get. Please leave satellite radio alone.
